Adjunct Faculty Search Committee
School of Business and Computer Science
Caldwell University
Caldwell, New Jersey

Re: Computer Science and Information Systems Adjunct Faculty Pool (Req. #2428) — Evening Availability

Dear Members of the Search Committee:

I am applying for the Computer Science and Information Systems Adjunct Faculty Pool at Caldwell University. I hold a PhD in Electrical and Computer Engineering from the University of Oklahoma and bring prior undergraduate teaching experience, extensive programming and AI/ML expertise, and applied engineering experience with AT&T, AT&T Labs, Futurewei, and Impac Exploration Services. I would welcome the opportunity to contribute to Caldwell's student-centered undergraduate education through on-campus evening courses.

At the University of Lahore, I served as a Lecturer in the Department of Technology, where I taught Computer Programming, Communication Systems, and Wireless Communication. I also supported communications laboratories and student assessment at the University of Engineering and Technology, Taxila, and mentored Bachelor's and Master's research projects at COMSATS University Islamabad. My instructional approach emphasizes clear explanations, hands-on exercises, structured problem solving, and timely, constructive feedback.

After reviewing Caldwell's 2026–2027 undergraduate catalog, I am particularly interested in teaching CS 195 Computer Programming I, CS 196 Computer Programming II, CS 340 Introduction to Data Science, CS 420 Artificial Intelligence, CS 415 Computational Models and Simulations, and CS 320 Networking and Communications. My research and professional work in Python, C/C++, data analytics, deep learning, large language model applications, simulation, and wireless systems provide a strong foundation for these courses. I am also interested in CS 216 Data Structures, CS 302 Design and Analysis of Algorithms, CS 322 Programming Languages and Paradigms, and CS 315 System and Analysis and Design, with appropriate review of the syllabi and course-specific preparation.

My industry experience has strengthened my ability to bring authentic data, software engineering practices, model evaluation, and technical troubleshooting into undergraduate assignments. I aim to help students connect underlying concepts with reproducible coding exercises and real engineering decisions while encouraging academic integrity, inclusive collaboration, and confidence in independent problem solving.

I am available for on-campus evening teaching, with class meeting times beginning at or after 5:00 p.m. I can provide evening office hours and responsive communication outside class, and I would be pleased to discuss suitable courses as openings arise.

Thank you for considering my application. I would welcome the opportunity to contribute to the School of Business and Computer Science and Caldwell University's commitment to student learning and academic excellence.

Sincerely,

Waseem Raza, PhD
