Professional Summary

Machine Learning Engineer and healthcare-AI researcher with a PhD in Electrical and Computer Engineering and experience applying deep learning, time-series modeling, wearable sensing, and reliable ML to real-world health-monitoring problems. Expertise includes Python, PyTorch, TensorFlow, scikit-learn, CNNs, LSTMs, attention, activity recognition, smartwatch IMU analytics, medication-taking detection, personalization, domain adaptation, few-shot learning, cross-user validation, and model evaluation. Complementary industry experience includes production ML, cloud data pipelines, data-quality validation, and multimodal analytics.

Technical Skills

Healthcare AI & Wearables: Wearable sensing, medication-adherence monitoring, activity recognition, smartwatch IMU data, human-centered sensing, and health-data applications

Deep Learning: CNNs, LSTMs, attention, transfer learning, domain adaptation, representation learning, classification, and sequence modeling

Time-Series & Sensor ML: Windowing, segmentation, feature engineering, temporal modeling, cross-user evaluation, personalization, and continuous-event detection

Reliable & Personalized ML: Distribution shift, few-shot adaptation, fairness-aware evaluation, robustness analysis, LOSO validation, and error analysis

Data & Engineering: Python, PyTorch, TensorFlow, scikit-learn, Pandas, NumPy, cloud analytics, data pipelines, APIs, and reproducible experimentation

Research & Evaluation: Experimental design, statistical analysis, sensitivity/specificity, precision/recall/F1, cross-validation, visualization, and technical communication

Leadership and Professional Strengths

- **Ownership and accountability:** Lead AI/ML initiatives through requirements analysis, data preparation, model development, validation, stakeholder review, and deployment planning.
- **Technical leadership:** Define technical approaches, evaluate alternatives, coordinate experimentation, and communicate findings to guide projects from ambiguous requirements to measurable outcomes.
- **Cross-functional collaboration:** Work with software engineers, network specialists, researchers, geologists, and public-safety stakeholders to translate domain requirements into practical data and AI solutions.
- **Continuous learning:** Apply ongoing study in generative AI, agentic AI, RAG, LLM evaluation, and cloud-native platforms through hands-on projects and professional coursework.
- **Reliability and commitment:** Maintain reproducible workflows, careful validation, and attention to detail throughout experimentation and delivery.
- **Adaptability and problem solving:** Combine critical thinking, systematic experimentation, and data-driven analysis to address unfamiliar technologies and complex operational problems.

Professional Experience

Machine Learning Engineer

AT&T, contractor via Innovatix Inc.

02/2025 - Present

Bedminster, NJ

- Lead end-to-end development and validation of production machine-learning workflows for high-impact operational decision support, including data preparation, model evaluation, error analysis, and reliability testing.
- Design domain-adaptive neural models and reusable preprocessing pipelines to improve model generalization under heterogeneous data distributions.
- Develop multimodal AI workflows that combine structured and unstructured operational data, providing transferable experience for complex real-world data environments.
- Partner with cross-functional stakeholders to translate domain requirements into validated ML workflows and production-oriented data assets.

Data Scientist and AI/ML Engineer

Impac Exploration Services

09/2024 - 12/2024

Weatherford, OK

- Developed scalable analytical and ETL pipelines using Python, Azure Databricks, Azure Functions, and Synapse Analytics for large domain datasets.
- Built reusable ingestion, cleansing, transformation, and validation workflows for machine-learning and LLM-assisted analytics.
- Implemented cross-validation, data-quality, and consistency checks to improve reliability and reproducibility of analytical outputs.

Graduate Research Assistant

AI4Networks, University of Oklahoma

09/2019 - 07/2025

Tulsa, OK

- Designed reusable Python simulation and data-generation platforms for large-scale experimentation, including a 3GPP-compliant network simulator and an AI-enabled 5G testbed.
- Built transfer-learning, adversarial-learning, GAN, autoencoder, and reinforcement-learning pipelines for sparse-data and cross-domain modeling.
- Developed robustness evaluation frameworks for models operating under distribution shifts, missing data, and limited labeled samples; led 100+ experiments from problem formulation through validation.

- Developed scalable self-healing and outage-management frameworks that improved modeled network resilience by 30%.
- Published peer-reviewed research, presented technical results internationally, and mentored junior researchers in ML implementation, experimental design, and technical writing.

Education

PhD, Electrical and Computer Engineering	09/2019 - 07/2025
University of Oklahoma, Norman, Oklahoma, USA	
MSc, Telecommunication Engineering	08/2014 - 08/2016
University of Engineering and Technology, Taxila, Pakistan	
BSc, Telecommunication Engineering	11/2010 - 06/2014
University of Engineering and Technology, Taxila, Pakistan	

Selected Projects

Wearable Intelligence for Health Monitoring	2024-2026
<i>Research Project</i>	
• Deep-learning methods for continuous recognition of medication and dietary activities from wrist-worn inertial sensors.	
<i>Tools & methods:</i> Wearable AI, Time Series, Deep Learning, Smartwatch Sensing	
Cloud Computer Vision	2025
<i>Guided Project</i>	
• Real-time object detection, vehicle counting, and image-classification workflows using cloud-native AI services.	
<i>Tools & methods:</i> Computer Vision, Streaming, Google Cloud AutoML, Python	

Certifications

- 1. Deep Learning for Healthcare Specialization** — [University of Illinois Urbana-Champaign / Coursera](#) | Completed (0/3) courses
Focus: An advanced specialization covering health-data processing, neural-network methods, and the development of deep-learning solutions for real-world medical and healthcare applications.
Tools & Skills: Deep Learning, Healthcare AI, Health Informatics, Health Data Processing, Artificial Neural Networks, Convolutional Neural Networks, Recurrent Neural Networks, Autoencoders, Generative Models, Medical Image Analysis, Supervised Learning, Unsupervised Learning, Predictive Modeling, Model Evaluation, PyTorch, Jupyter Notebooks
- 2. Machine Learning** — Stanford University / Coursera | Completed
Focus: Core supervised and unsupervised learning, model evaluation, optimization, and practical ML system development.
Tools & Skills: Supervised Learning, Unsupervised Learning, Model Evaluation, Optimization
- 3. Google Cloud Data Analytics Professional Certificate** — Google Cloud / Coursera | Completed
Focus: Cloud data transformation, analysis, visualization, and decision support using Google Cloud tools.
Tools & Skills: SQL, BigQuery, Data Analytics, Visualization
- 4. IBM Generative AI Engineering Professional Certificate** — IBM / Coursera | Completed (13/16) courses
Focus: Sixteen-course professional certificate developing job-ready skills across AI foundations, Python application development, machine learning, deep learning, NLP, transformer architectures, LLM fine-tuning, RAG, LangChain, and AI agents.
Tools & Skills: Generative AI Engineering, Large Language Models, Transformer Architectures, Prompt Engineering, RAG, LangChain, AI Agents, Hugging Face, PyTorch, Keras, Scikit-learn, Python, Flask, Gradio, PEFT, LoRA, QLoRA, RLHF, DPO, PPO, NLP, Machine Learning, Deep Learning, Vector Databases
